

Smart Innovation, Systems and Technologies

Volume 442

Series Editors

Robert J. Howlett, KES International, Shoreham-by-Sea, UK

Lakhmi C. Jain, KES International, Shoreham-by-Sea, UK

The Smart Innovation, Systems and Technologies book series encompasses the topics of knowledge, intelligence, innovation and sustainability. The aim of the series is to make available a platform for the publication of books on all aspects of single and multi-disciplinary research on these themes in order to make the latest results available in a readily-accessible form. Volumes on interdisciplinary research combining two or more of these areas is particularly sought.

The series covers systems and paradigms that employ knowledge and intelligence in a broad sense. Its scope is systems having embedded knowledge and intelligence, which may be applied to the solution of world problems in industry, the environment and the community. It also focusses on the knowledge-transfer methodologies and innovation strategies employed to make this happen effectively. The combination of intelligent systems tools and a broad range of applications introduces a need for a synergy of disciplines from science, technology, business and the humanities. The series will include conference proceedings, edited collections, monographs, handbooks, reference books, and other relevant types of book in areas of science and technology where smart systems and technologies can offer innovative solutions.

High quality content is an essential feature for all book proposals accepted for the series. It is expected that editors of all accepted volumes will ensure that contributions are subjected to an appropriate level of reviewing process and adhere to KES quality principles.

Indexed by SCOPUS, EI Compendex, INSPEC, WTI Frankfurt eG, zbMATH, Japanese Science and Technology Agency (JST), SCImago, DBLP.

All books published in the series are submitted for consideration in Web of Science.

Preface

This book—*Advances in Tourism, Technology and Systems: Selected Papers from ICOTTS 2024, Volume 2*—from the SIST Series is composed of the best selected papers accepted for presentation and discussion at the 2024 International Conference on Tourism, Technology and Systems (ICOTTS'24). The ICOTTS is a multidisciplinary conference with a special focus on new technologies and systems in the tourism sector and was held between 30 and 31 October 2024. The ICOTTS'24 was supported by the University of Madeira, in Funchal, Portugal and by International Association for Digital Transformation and Technological Innovation (IADITI).

The International Conference on Tourism, Technologies and Systems is an international forum for researchers and professionals in the tourism sector, which enables the discussion of the latest innovations, trends and concerns in several areas, in the Tourism sector, associated with Information Technologies and Systems. It is an event for professionals in the sector, in search of technology solutions, where academics, IT experts and business managers meet to discuss new ideas that help them maximize the potential of tourism business through technology.

The ICOTTS'24 Scientific Committee is composed of a multidisciplinary group of 140 experts who assessed some 296 papers from 28 countries, received for each of the main topics proposed for the conference: (a) Tourism research in providing innovative solutions to social problems; (b) Information and communication technologies in hospitality and tourism industry; (c) Sustainable Tourism; (d) Tourism Trends; (e) Health and wellness Tourism; (f) Tourism Management; (g) Marketing strategies in hospitality and tourism industry; (h) Hospitality, tourism, and food-service environment; (i) Tourism in the different scientific areas; (j) eTourism and Tourism 2.0.

The papers accepted for presentation and discussion at the Conference are published by Springer and will be submitted for indexing by ISI, SCOPUS, EI-Compendex, Google Scholar and Springerlink.

We thank all those who contributed to the ICOTTS'24 conference (authors, committees, workshop organizers and sponsors). We deeply appreciate your involvement and support, which were crucial to the success of the conference.

About the Editors

António Abreu is a coordinating professor at the Higher Institute of Accounting and Administration of Porto, Polytechnic University of Porto. He has post-doctorate in Information Technologies and Systems, by the University of Coimbra, Department of Computer Engineering of the Faculty of Sciences and Technology of the University of Coimbra. He has Ph.D. in Software Engineering based on reusable components with Human-Machine Interface applications, by the University of Vigo and Master in Management Informatics by the University of Minho and Degree in Informatics Applied Mathematics by the Lusíada University. He is currently a lecturer, in the scientific area of Information Systems, at the Instituto Superior de Contabilidade e Administração do Porto/Politécnico do Porto, ISCAP/PPorto.

João Vidal Carvalho Post-Doctorate in Technologies and Information Systems at the University of Coimbra. Associate Professor at Porto Accounting and Business School/Polytechnic University of Porto (Portugal). Ph.D. in Information Systems and Technology from the University of Santiago de Compostela, Master in Information Technology Management from the University of Minho and Degree in Informatics/Applied Mathematics from the Portucalense University. He was (between 2020 and 2022) Vice-Director of the Research Center for Organizational and Social Studies of the Polytechnic of Porto (CEOS.PP). Effective member of the Committee for Recognition/Certification of Skills of ISCAP/Polytechnic University of Porto. Vice-President of IADITI–International Association for Digital Transformation and Technological Innovation. General Chair of the International Conference on Tourism, Technologies and Systems (ICOTTS) and General Chair of the International Conference on Information Technologies and Education (ICITED). Editor-in-Chief of the *Journal of Information Systems Engineering and Management* and Editor-in-Chief of the *Journal of Information and Communication Technologies*. He has published books in computer science and database management and is the author of fifteen publications in scientific journals with a JCR impact factor (Q1/Q2).

Dália Liberato has Ph.D. in Tourism Management and Planning and Master's in management and Planning of Inland and Health Tourism, from the University of

Vigo (Spain). She is an associate professor at the Tourism and Leisure Department of the School of Hospitality and Tourism (Polytechnic Institute of Porto), where she teaches several curricular units in Tourism at undergraduate and master levels. Currently, she coordinates the Tourist Activities Management degree in the same school (ESHT-P.PORTO). Her main research interests are Tourism Destination Planning and Management and Regional Development, Tourism Management, Tourism Planning, Border Tourism, Creative Tourism and etourism. She supervised and co-supervised several M.Sc. dissertations and Ph.D. theses.

Rui Alexandre Castanho holds an International Ph.D. on Sustainable Planning in Borderlands. Nowadays, he is a vice dean for Sustainable Development at the WSB University, Poland, and a visitor Professor at the University of Johannesburg, South Africa. He is a European Climate Pact ambassador. Besides, he completed a post-doc researcher on the GREAT Project, University of Azores, Ponta Delgada, Portugal. Furthermore, he collaborates with the ECIDES Research Group—University International of La Rioja (UNIR), Spain; vice-coordinator of VALORIZA—Research Center for the Enhancement of Endogenous Resources, Polytechnic Institute of Portalegre (IPP), Portugal. Moreover, he has graduated in Green Spaces Engineering and Agricultural Engineering and holds a Master's Degree in Planning, Audit and Control in Urban Green Spaces.
